

## How it Works

### “Funny Money”

Each guest receives a "casino money" envelope. Inside each envelope are several, over-sized bills, or "funny money". Guests trade their funny money at the table of their choosing for chips, just as they would at a real casino. A guest may cash their whole bankroll at one table, or spread it around, spending a little at each table as they move through the casino (a little on blackjack, a little on roulette, etc.)

### Prizes

Host/hostesses are responsible for supplying the prize(s). Towards the end of the night, our dealers will initiate a chip count.

Option 1. *Simple and Easy.* The guest that has made the most out of his or her initial bankroll wins first prize. (2<sup>nd</sup> and 3<sup>rd</sup> place prizes may also be given).

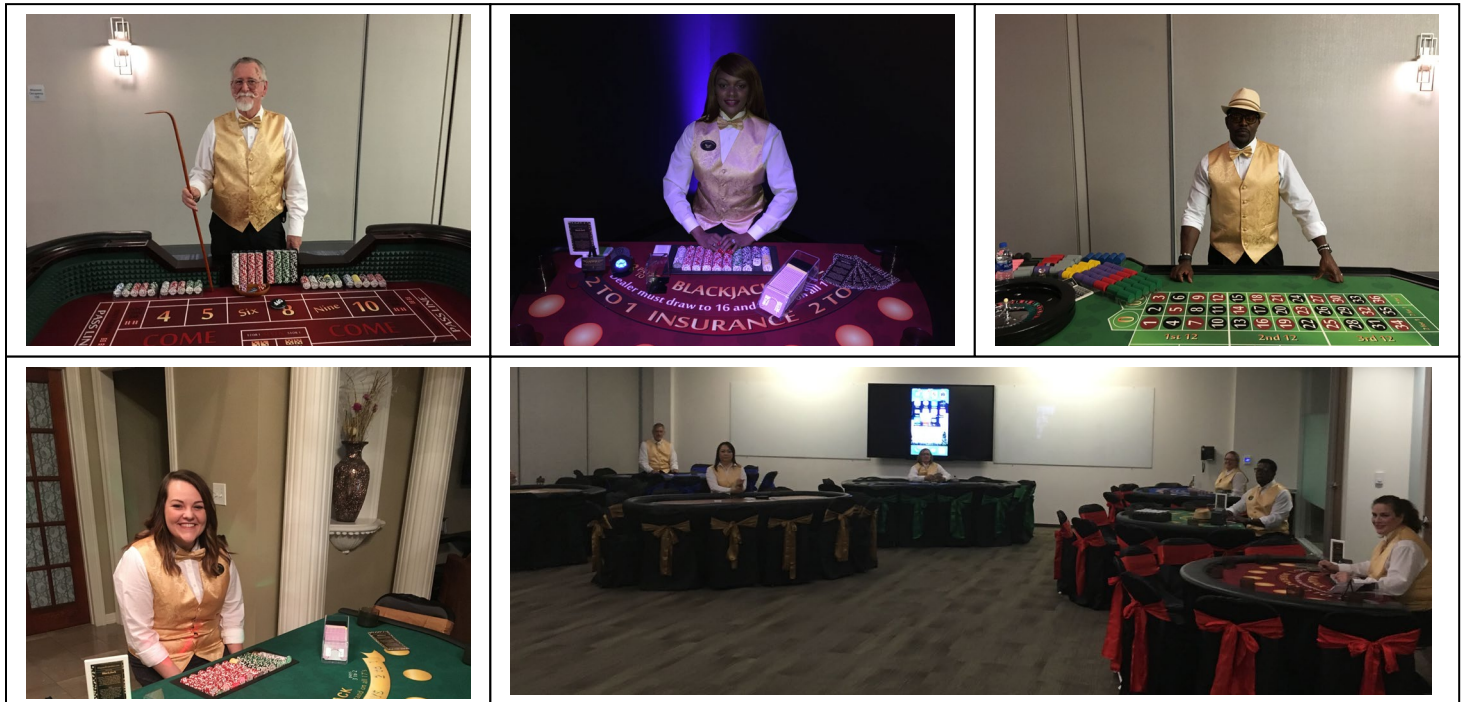

Option 2. *Everyone Has a Chance.* The dealers will give guests one raffle ticket for every \$100 in chips (or portion thereof) a guest has at the end of the night. The guest that has made the most out of his or her initial bankroll will have the most raffle tickets and hence, the most chances to win a prize. However, even guests who play, but who have not "won big" will get some raffle tickets, and therefore, still have a chance at a prize. All tickets go into a raffle bin and a ticket is pulled. The person holding the lucky ticket is the winner. The host/hostess can give multiple prizes.

We do the work!
